

Poster Contest ART of Science Communication

HOSTED BY:

the
Chickasaw
Nation

Wednesday 8:00 a.m. - Undergrad Poster Displays

Thursday 8:00 am - Graduate Poster Displays

Undergraduate and graduate students engaged in projects, research, outreach, or advocacy are invited to participate in a “non-traditional” poster competition—where science meets art! Instead of traditional research posters, this competition challenges you to communicate your findings through artistic expression.

Science communication is more than just presenting data—it’s about making complex ideas accessible and engaging for diverse audiences. Whether through visual art, digital media, graphic storytelling, or other creative formats, your work should inspire, inform, and connect with people beyond the scientific community.

Purpose

- Educate: Help people understand science and the world around them
- Inspire: Get people excited about learning and science
- Bridge gaps: Connect the public with scientists and scientific research
- Make informed decisions: Help people make decisions that impact their lives

SOUTHERN PLAINS
LAND STEWARDSHIP SUMMIT

Instructions:

Enter in a poster (max 3'x5') that uses any form you like to communicate your research or outreach. Feel free to be creative! Use infographics, design elements, marketing ideas, and ART.

Cash Prizes: Undergraduates and Graduates will be judged and awarded separately (3 awards each group)
\$500 first place, \$300 second place, \$200 third place

Register online with the Student Registration to be entered into consideration
